ASK THE EXPERT

Meet Lee Stafford. For the past five years he's been the man behind the most expensive haircut in the world

Q How much is a haircut with you?

A The Couture Cut is \$2,000, but I can travel to a home or office, fly to a business trip or wherever for \$4,000.

Q How long does the experience take?

A As long as the client would like. If she wants me to spend the entire day, she'll have me for it.

Q What makes your service worth the price?

A Intimacy. Not only do I wash, cut and blow-dry, but we have champagne and hors d'oeuvres. I discuss the client's lifestyle, priorities and the looks she wants to achieve. I take into consideration bone structure, height and taste in clothing. I have to access the entire person, unlike a salon where most hairdressers only see women in very unflattering gowns. I make a woman look how she wants to look. Also included in the cost is a goody bag of products and a follow-up visit in six weeks.

Q What sets you apart from the rest?

A I put heart and soul, skills and knowledge into it. There's a mutual relationship and understanding with the client. She won't see the cut on anyone else, and it will be the best she'll ever look. For our time together, she is my muse.
